It is said that ಕಿಡ್ಲು ಪೂಜೆ (Lightning service) is rendered to the deity once in 8 or 10 years. No one lives on the hill except the archak and the guards. The temple enjoys a puduvat tasdik of Rs. 10-6-6. The temple is in a neglected condition. An estimate was prepared some 8 or 10 years ago for its repairs, but nothing has come out of it. The temple is leaky and the archak and the guards have no protection against sun and rain and the Vigraha gets inundated. It is prayed that the temple may be put in repairs.

Improvement of Attigodukere
Mr, H. C. Subba Rao.

Summary of Representation.—The improvement of Attigodu tank is much desired. A very large shandy is held there. The tank being shallow it does not retain all the water coming to it, but drains off into the waste weir to the prejudice of the shandy people in hot weather. Pray that the waste weir be raised by 2 feet and the bund strengthened with side embankments. The shandy is held in the centre of the village. Thefts are of very common occurrence and the chances of detection are rare as the houses are close by and the thieves find shelter in them. In the interests of the people it is desirable that the present shandy be removed to the "Tandri Tope" attached to the village which is an open ground and is on a higher level.

Reply of Government.—Will be inquired into by the Public Works Department.
